**MD Elektronik is a global provider of electronic solutions, serving a range of industries with design, manufacturing, assembly, and testing services. The company is committed to delivering innovative and high-quality solutions to meet customers' needs.**

With the use of cutting-edge technology, including 865 monocrystalline solar panels, our team delivered a solution with a 502 kWp installed capacity. This system is capable of producing 1,006 MWh annually, resulting in a significant reduction of 438 tons of CO<sub>2</sub> emissions per year. By leveraging renewable energy, our client is not only reducing their carbon footprint but also achieving substantial cost savings.

Solar Modules	Longi Solar, 580Wp
Inverters	SMA STP62-US-41
Performance Ratio	82.9 %
Warranty	12 years
