MONOCRYSTALLINE SOLAR PANELS

Holiday Inn Express is a global hotel chain, offering reliable and affordable accommodations. The company provides modern amenities, complimentary breakfasts, and efficient check-in processes to ensure a pleasant stay. Holiday Inn Express is dedicated to delivering value and convenience to meet guests' needs.

Our latest successful PPA project, which provides clients with significant energy savings and environmental benefits, is the Holiday Inn Express. With the use of cutting-edge technology, including 502 monocrystalline solar panels, our team delivered a solution with a 279 kWp installed capacity. This system is capable of producing 500 MWh annually, resulting in a significant reduction of 218 tons of CO₂ emissions per year.
