Hirschmann Automotive is a global leader in automotive solutions, specializing in high-quality electrical components. The company offers innovative technologies, robust design, and reliability to meet industry demands. Hirschmann Automotive is committed to providing value, efficiency, and superior performance to clients worldwide.

Our latest successful project for Hirschmann Automotive offers substantial energy savings and environmental benefits. Utilizing advanced technology, including 960 monocrystalline solar panels, our team delivered a solution with a 562 kWp installed capacity. This system is capable of producing 1.078 GWh annually, leading to a significant reduction of 472 tons of CO₂ emissions per year.

Solar Modules	Longi, LR5-72HTH-585M
Inverters	SolarEdge SE100KUS
Sustainability	22 %
Warranty	25 years
