**Quimica Coyoacan, a prestigious laboratory based in San Luis Potosi, Mexico, specializes in dietary supplements and cosmetics. As a 100% Mexican company, it is committed to quality and sustainability, striving for excellence in product innovation and development.**

We have successfully completed the optimization and extension of the solar system for Quimica Coyoacan, combining a strategic relocation of modules to reduce shading with the installation of additional panels. The system now totals 189 kWp and delivers an estimated annual production of 324 MWh, strengthening Quimica Coyoacan's commitment to renewable energy, environmental responsibility, and long term operational efficiency.
