ELECTRICITY SAVINGS:
604,116 kWh

	Original installation	ARGIA lighting solution
Type of luminary	Discharge luminaires 400 W	INLENE series
Number of luminaires	243 units	202 units
Total Input	115.43 kW	31.52 kW
Consumption kWh/year	831,060 kWh	226,944 kWh
Project result	The customer's total operating costs were reduced by up to 73%.	
Warranty	2 years	

For MINER POWERBRACE, the Rails Division, we have replaced the obsolete, inconvenient discharge lighting with new modern energy saving LED luminaires in the production hall and welding shop, without interruption of continuous operation. New LED luminaires are switched off depending on the intensity of daylight. The installation was carried out at heights of 10 to 13 m and for stages according to

the customer's schedule. The installed luminaires are ready for future analog dimming, which will bring further savings to the customer. The installation of energy savings LED luminaires has doubled the level of illumination and at the same time the customer saves up to 73% of the operating costs of lighting.
