Return on investment	3.7 years	

For the company WITTE Nejdek, spol. s r.o., a manufacturer of machine parts for automotive, we have exchanged obsolete artificial luminaires for new modern LED luminaires. The installation was carried out during the reconstruction of the tool room. After installing the technology, important working

areas were additionally illuminated – lathe workstations, grinders and other work desks. The total operating costs of the customer have been reduced by 65% despite a high illumination level of 500 lx. Everything was delivered in time, in perfect quality and full of customer's requirements.
