Budenheim México is a leading manufacturer of specialty chemicals, focusing on phosphates and sulfates. They provide innovative, sustainable solutions for food, pharmaceuticals, and water treatment, ensuring high-quality and reliable products that meet global standards.

Our latest project for Budenheim delivers remarkable energy savings and environmental advantages. With 573 monocrystalline solar panels installed, we achieved a 335 kWp capacity, producing 510.4 MWh annually. This system also contributes to a significant annual CO₂ reduction of 224 tons, demonstrating our commitment to sustainability and advanced energy solutions.

Solar Modules	Longi, LR5-72HTH-585M
Inverters	Growatt MAX 150KTL3
Energy Independence	32 %
Warranty	25 years
