MONOCRYSTALLINE SOLAR PANELS

SAG Mexico is a leading supplier of light-weight aluminum and composite solutions for the automotive and transportation industries, specializing in fuel and air systems. They deliver innovative, sustainable products that enhance vehicle efficiency, meeting the highest global standards for quality and performance.

Our latest project for SAG Mexico showcases exceptional energy efficiency and sustainability benefits. With 936 monocrystalline modules of 615 W installed, the system delivers a PV capacity of 575.6 kWp, powered by three 150 kW Huawei inverters. This setup achieves an impressive annual production of 1,012 MWh, preventing 443 tons of CO₂ emissions per year, underscoring our dedication to innovative and environmentally friendly energy solutions.

This project is part of the CPA Logistic Center Tlalnepantla and was developed in collaboration with Corporate Properties of the Americas.

Solar Modules	Longi, LR7-72HTHF-615M
Inverters	Huawei 150kW SUN2000
Energy Independence	64 %
Warranty	25 years
