Service Management Solutions is a trusted provider of logistics, warehousing, and value-added services for the automotive industry. Focused on operational excellence and customer satisfaction, they deliver tailored solutions that optimize supply chains and support global manufacturing standards.

Our latest project for Service Management Solutions highlights outstanding energy efficiency and environmental benefits. With 252 monocrystalline solar panels installed, delivering a total PV capacity of 155 kWp, the system achieves an impressive annual production of 278 MWh. Thanks to high-performance inverters and system design, it prevents 122 tons of CO₂ emissions per year, demonstrating our commitment to innovative and sustainable energy solutions.

Solar Modules	Longi, LR7-72HTH-615M
Inverters	Growatt MAX 124KTL3
Energy Independence	100 %
Warranty	25 years
