Consumption kWh/year	552,552 kWh	<b>183,485 kWh</b>
Project result	<b>Customer's total operation costs reduced by 67%.</b>	
Return on investment	<b>3 years</b>	

For ASSA ABLOY Czech & Slovakia s.r.o., a leading manufacturer of security locks and access systems, we realised a complete supply and installation of LED luminaires for indoor, outdoor and emergency lighting in a new production hall and storage hall. Both halls are illuminated by LED lights on a continuous-row system

with various optics considering the anticipated use of the space. The outdoor lighting contains 65 LED THORN CIVITEQ luminaires. We also supplied 115 emergency LED luminaires. The total operating costs of the customer will be reduced by 67 % compared to the planned installation of linear fluorescent tubes T5.
